

Researching the Seasons

Earth's seasons affect not only temperatures, but also how much daylight is available during specific times of the year.

Use the links below to research Earth's seasons and view animations that show how seasons change. Then use the interactive worksheet to answer some questions about what you learned. ([Rubric](#))

Seasons of the Year

June 21 is called the first day of summer, but it is also the longest day of the year. Why not call it the peak of summer? Find the answer to this question and many others on this NASA Web site.

Here Comes the Sun

Visit this Web site by Plymouth State College to learn more about Earth's seasons. Be sure to scroll to the bottom of the page and click on all the mini-lessons.

Interactive Worksheet: Earth's Seasons

Do you know it all? Check your knowledge of Earth's seasons by completing this interactive worksheet.
